MAKES YOU FEEL SAFE, MAKES YOU FEEL HAPPY

We are Empanelled Agency of GHMC for Fire Mitigation Certification (ID No.1154)

## About us

**VSR Fire & Safety Systems** specializes in comprehensive solutions for Fire Fighting and Life Safety. Our mission is to minimize risk, ensure safety, and optimize asset performance for our clients. With a focus on innovation, our experienced **VSR ENGINEERS** manage every aspect of the asset lifecycle through expert consultation. We prioritize delivering top-quality services and solutions, adding value to our customers' success. Leveraging cutting-edge technologies, we offer customized solutions in Fire Fighting and Life Safety Sectors from Concept to Commission. As a leading Fire Fighting Company with over 3 years of experience in Design and Build, we are committed to customer satisfaction and excellence in technology and service.

## OUR PRODUCTS & SERVICES

We are Empanelled Agency of GHMC for Fire Mitigation Certification (ID No.1154)

## FIRE BALL

A conventional fire extinguisher, which requires being operated manually, has its own drawbacks. It is quite heavy and demands considerable effort to operate it. There might even arise an occasion when children need to operate this bulky extinguisher for putting off a fire. Also, by the time someone manages to successfully operate it, there is a chance that the fire might have already done a regrettable damage.

The Fire Xterminator resolves all the above problems with its futuristic features. The Self Activating Fire Extinguishing (S.A.F.E) mechanism used in the Fire Exterminator ensures that the users and other valuables are safe. It does not require any manual operation as it automatically extinguishes a fire upon coming in contact with it. This equipment is light in weight and handy to use. It is easily portable and can also be used by children if the need arises.

### **EASY TO USE**

FX weighs only a mere 1.3 kgs+/-20 gms and has a diameter of 144 mm. These features make it easy to carry and use.

### **AUTOMATED OPERATION**

FX gets self activated at 60 - 80 degrees flame or fire temperature when in contact with the fire and when not in direct contact with the fire, it gets activated at a temperature of 285 degrees Centigrade.

### **COVERS WIDE AREA**

The fire is extinguished in a 360-degree angle while sweeping an area of about 20-25 sq ft This ensures there is no scope for further damage.

### **ALERTS OTHER PEOPLE**

In the process of extermination, FX produces a sound in the permissible range of 120-138 decibels thereby alerting the surrounding people.

### **QUICK TO RESPOND**

FX takes around only 3-5 seconds to self activate to extinguish the fire.

### **NO MAINTENANCE REQUIRED**

It requires no maintenance or any wiring or ducting. The process of installation also requires minimal effort.

### **ECO-FRIENDLY PRODUCT**

FX is composed of biodegradable substances that are 100% eco-friendly.

### **LONG SHELF LIFE**

FX has a long shelf life of 5 years.

### **CAN EXTINGUISH MANY TYPES OF FIRE**

FX can extinguish three classes of fire. These are the solid, liquid, and the electrical classes of fire.

### **CAN BE USED MORE IN NUMBER IF REQUIRED**

For a fire spread over an area of more than 2.596 cubic meters, 2 or more FX can be used for an effective extinguishment of the fire.

## QUALITY ASSURANCE

We believe that principle factor in performance of an organization is the quality of products and services it offer. And to make a mark for our organization we thrust and strive to provide quality products and services to our customers. To maintain the standards we follow the below procedures

### Documentation Control System

Documentation control system is being adopted to ensure effective execution and delivery of end product as per the specification and agreed standard. Our document control system starts from initial survey of the site till the end of defects liability period of a particular project to ensure complete satisfaction to the client during execution of project and even during after sales services.

### Quality Assurance Plan

Quality assurance plan consist of a number of reference data is prepared based on the quality requirement of a particular item as per the agreed specification. Quality assurance plan will identify various quality control. measure at various stages of manufacture/system integration i.e., raw material procurement, in process of and final product in the form of checks/test etc., and verification of certificates/ documentation.

### Conformity to Standards and Specifications

Specification and standard agreed upon will be followed to the maximum extend to ensure customer satisfaction.

## CUSTOMER SERVICE

### CLIENT SATISFACTION IS OUR TOP PRIORITY.

By accurately identifying the clients' needs and expectations, we undertake to exert every effort to achieve their satisfaction.

We always make a conscious effort to find what our clients need and address their queries in a timely manner.

Our client retention rate is high.

Prompt delivery and after sales services are the key to our success and our ever-expanding loyal client base.
